

Printing instructions:

You can print this page as you would any other pdf document. If possible, you could use a thicker type of paper. Check your printer's manual to see what the maximum thickness is. In the window of your printer settings you can play with the size % to print it smaller. After printing it you can cut it out on the dotted line, or close to the outer black line of the drawing itself.

Have fun & thank you once again!
